What to study next:

How we could avoid entry in that stock?

If we used two triggers
(i) Daily close over EMA8 , or
(ii) crossover of 5,34 MACD
we would avoid that stock

Triggers to go long

- [x] Daily Close over EMA 8 or/and
- [x] Crossover of a signal line (average with a period of 3 over 5, 34 MACD)

Checklist for the long setup

- [x] The strength of the rally was confirmed by (i) new higher highs for the last 60 days, (ii) RSI overshooting the upper threshold at 68 level and (iii) MA50 that changed the slope up

- [x] Price declined into support of the Green Demand channel and RSI held over support level at 40 and confirmed that the move down was corrective rather tand a strong trending move that would overshot the lower threshold at 32

- [x] Bears were unable to push price under the Green Demand channel

- [x] We should prefer to buy pullbacks **that are comprised of three moves a down, bup and c down** and/or shaped as a **wedge, flag or pennant**

What to study next:

How we could avoid entry in that stock?

If we used two triggers
(i) Daily close over EMA8 , or
(ii) crossover of 5,34 MACD
we would avoid that stock

Triggers to go long

- Daily Close over EMA 8 or/and
- Crossover of 5, 34 MACD
- We only take a trade when a trigger condition has been met provided ***that all other conditions of our system remain valid***
